CP3405 DESIGN THINKING III · TR3 2026 · SPRINT 8 (vW8)

Team [N]

Catch up, then read the volume

R1 [name] · R2 [name] · R3 [name]
R4 [name] · R5 [name] · R6 [name]

Monday 2 November 2026

How our 15 minutes run

Min	What happens	Who
0–1	Our Step A status	Presenting R1
1–5	Live demo: data script, server, all seven tiles	Presenting R6, R5
5–8	One indicator explained (row and member chosen by the checking team)	Checking team picks
8–10	The volume panel and its label	Presenting R3
10–12	Biggest mismatch in verify.md	Presenting R4
12–14	The four weekly calls	Presenting R2
14–15	Teamwork evidence and what we fix next	Presenting R1

Step A: our eight checks

#	Check	Status	Evidence (commit or file)
1	Seven tiles, each with its rating	[Pass / Fail]	[commit]
2	Summary = all 23 votes	[Pass / Fail]	[commit]
3	Needle points at the score	[Pass / Fail]	[commit]
4	Price change from previous daily close	[Pass / Fail]	[commit]
5	Bar time = last completed bar, SGT	[Pass / Fail]	[commit]
6	Working on every row; MA Buy/Sell	[Pass / Fail]	[commit]
7	verify.md: 30 Min, Hourly, Daily	[Pass / Fail]	[file]
8	index.html links to gold.html	[Pass / Fail]	[commit]

Live demo

R6 starts it, live

```
python engine/dashboard_data.py --loop 60
cd ui && python -m http.server 8000
```

Bar time on screen: **[today, HH:MM SGT]**

R5 walks the page

1. Open index.html, then gold.html
2. Click all seven tiles
3. Checking R4 compares one timeframe with Investing.com

Switch to the browser now. No screenshots instead of the live page.

One indicator, explained

The checking team picks the row and the member. Fill this live, or prepare one slide per member if you used the reference engine.

Indicator and settings

[e.g. RSI(14), Wilder smoothing]

Inputs at this bar

[e.g. avg gain __, avg loss __]

Formula and result

[formula] = [value]

Rule and vote

[e.g. Buy > 50, Sell < 50] → [Buy / Sell / Neutral]

The volume panel

Timeframe shown

[15 Min]

Relative volume

[0.00×]

Label

[Confirmed]

Our numbers: last bar volume [__] ÷ average of the 20 bars before it [__] = [__×]

Why the label says this: [e.g. relative volume 1.6× and the bar moved down with a Sell Summary → Confirmed]

What a trader should do with it: [one sentence]

Our biggest mismatch

Timeframe and bar time	Item	Investing.com	Ours
[Hourly, HH:MM SGT]	[e.g. STOCH(9,6)]	[__]	[__]

Why they differ: [delay, forming vs completed bar, different settings, or a bug we found]

What we did about it: [fixed in commit ___ / explained in verify.md, line ___]

Volume check: our volume for one bar [__] vs the same bar on Investing.com's chart [__]

Our four weekly calls (vW8)

Market	Locked call (Wed 28 Oct)	Actual (Fri 30 Oct close)	Error
S&P 500	[___]	[___]	[__%]
Nasdaq 100	[___]	[___]	[__%]
Gold	[___]	[___]	[__%]
US 10-year yield	[___]	[___]	[__ bp]

Best call and why: [one sentence] · **Worst call and what we learned:** [one sentence]

How we worked this sprint

Member (role)	Commits	Stand-ups	Owned (FigJam card)
[name] (R1)	[__]	[__ of 3]	[card]
[name] (R2)	[__]	[__ of 3]	[card]
[name] (R3)	[__]	[__ of 3]	[card]
[name] (R4)	[__]	[__ of 3]	[card]
[name] (R5)	[__]	[__ of 3]	[card]
[name] (R6)	[__]	[__ of 3]	[card]

Merges into main: [__] · **Largest share of commits:** [__%] (limit 40%) · **Working agreement:** [link to FigJam]

Retrospective and what we fix first

Improved our teamwork

[one thing]

Did not work

[one thing]

First fix in Sprint 9

[the item, the owner, the date]

Recorded in **docs/live-test.md** today.
